

Compliance Checklist:

Conveyance Control Points for Sanitation & Safety Audits

April 13-16, 2026

MODEXSHOW.COM

A **NEW PRODUCT LINE** WILL BE ANNOUNCED AT MODEX!

Booth B7524

Sanitation + Safety Control Points to Review Before the Inspector Arrives.

Hygienic Design & Cleanability

A

- Hard-to-access surfaces slowing sanitation?
- Debris/harborage-prone areas (gaps, corners, dead zones)?
- Can crews visually verify clean surfaces quickly?
- Can cleaning be completed without excessive disassembly?

Wash-Down Readiness

B

- Components appropriate for wet environments?
- Built to withstand frequent cleaning cycles?
- Sanitation cycles causing premature wear or frequent replacement?

Safety & Risk Reduction

C

- Pinch points controlled/guarded appropriately?
- Stable flow through transfers/turns/merges?
- Controlled accumulation/buffering to avoid unsafe jams?
- Maintenance access points safe and practical?

Documentation & Repeatability

D

- Control points easy to document consistently?
- Maintenance intervals clear and realistic?
- Supports standardized SOPs without workarounds?
